S-TIM artifact and proposed deployment extensions
Observation streams
per-node T1–T4
no local fusion
Trust factors T1–T5
verified factors
cross-factor checks
Supervised risk model
shared encoder + risk head
auxiliary heads
Proposed aggregation
multi-observer fusion
not executed in artifact
Proposed constraint
budgeted reward
restricted access
temporal evidence
executed
design extension
Trust memory
historical score
recent evidence window
Allocation proxy
score-weighted task sampling
simulator-specific rules
